

Coastal Interior Design Is Done Best by These 19 AD PRO Directory Members

If you are looking for a decorator to handle your oceanside home, these are the names you should consider

By Elizabeth Stamp

Coastal interior design bring the tranquility and natural influences of seaside locales into private homes. But while the style can be as relaxed as a day at the beach, many professionals have elevated the classic coastal look, adding touches of sophistication and luxury to waterfront and landlocked homes alike. Today's coastal interior designers take traditional elements such as nautical nods, blue-and-white hues, wood paneling, rattan furnishings, linen textiles, and tropical motifs and add contemporary accents, bold colors, and blue-chip art to the mix. Natural beauty is a through line in the work of these design talents—all of whom are listed on the AD PRO Directory. So whether you want a beach-y retreat or a

polished, nautical-inspired penthouse, these examples of coastal interior design are inspiring and timeless.

Natalia Miyar Atelier

Designer and architect Natalia Miyar is all about comfort and glamour, no matter what style or location she's working in. With offices in New York, London, and Miami, the designer has tackled a variety of coastal projects, from this lush, garden-inspired Miami home to art-filled modernist and rustic-meets-contemporary villas in Ibiza. Natalia Miyar Atelier prides itself on helping clients showcase their personal stories and passions in their homes, allowing their backgrounds, interests, and tastes to shine through.

"The reception room in our Miami project is a standout because of the vibrant colors and patterns I used in creating the space," says Miyar. "The room includes special pieces from my own collection, including the sofa, coffee table, and rug, and the vintage armchairs are in Dedar fabric. The room is anchored by the artwork, including a painting of the Florida landscape by Magnus Sodamin, and a mixed-media on board with artist's plexi box collage by Pepe Mar."
